

MURRIETA'S WELL

ESTATE VINEYARD

Dry Rosé

LIVERMORE VALLEY

VINEYARD

Our wines are exclusively sourced from our estate vineyard in the Livermore Valley. Both varieties in this wine were grown in our Hayes vineyard located on the southwest portion of our estate. This vineyard has the widest elevation range (560-860 feet) on our estate. Of the 20 grape varieties we grow, 11 of them are grown on the Hayes vineyard because it features the largest array of soils, aspects and slopes. We farm both of these varieties block by block according to their specific growing attributes to ensure optimal flavor and fruit expression.

Grenache: Hayes | Counoise: Hayes

WINEMAKING

FERMENTATION | Both varieties were hand-picked in the early morning hours, brought to the winery and gently whole cluster pressed. Each varietal was cold-fermented separately to retain the natural fruit esters and flavors of the grapes.

AGING | The wine was racked after primary fermentation and the varietals were aged in their distinct pieces for about a month. After the final blend was made, the wine was transferred into a blend tank and aged for about two months in stainless steel tanks prior to bottling.

HARVEST

Both of these varieties were picked in October 2016. This vintage had a bit more available ground water than the past few vintages in the Livermore Valley thanks to moderate rains in the winter. We saw nice growth in the canopies that provided excellent fruit development. The warm growing season provided the perfect conditions to achieve optimal fruit expression.

ROBBIE'S TASTING NOTES

This wine displays a vibrant peach color with aromas of strawberry, ripe watermelon and hibiscus. Berry, melon and floral flavors dance across the palate with a full textured body and balanced, crisp acidity. Enjoy through 2018.

2016

VARIETAL COMPOSITION
